&

XYANNI

India Partnership for Emerging Enterprise

PHD House

New Delhi
India

26th, 27th, 28th June 2008

Featuring two of the world's most popular ink jet events. There is a single registration / sponsorship fee for both.

Ink Jet Academy

Theory of Ink Jet Technology

Ink Jet Academy is happening for the third time in India. It provides a programme and format to get an expert start in the ink jet industry, to get an update or to open up new ink jet fields.

Understanding the fundamentals is a prerequisite to any development. The Ink Jet Academy offers a course covering the basic theory of all the diverse types of ink jet technology in use today. Learn how the printheads work, what materials are used in their fabrication and the theory of operation. Learn about inks and media, how they are formulated and the supply and support systems. This course assumes a basic scientific knowledge and will provide a useful background to anyone entering the ink jet industry or seeking an efficient update of ink jet technology.

Ink Jet

Components, Consumables, Equipments

India 2008

This is a new event specially created to help fulfill the needs in India. It is inspired by a much acclaimed event - Ink Jet Technology Suppliers Showcase and various other events that happen in the USA.

IMI's Ink Jet Technology Suppliers Showcase is a proven programme concept to enable current and potential ink jet printing system developers, integrators and users to obtain detailed technical information and establish professional working relationships with base ink jet printing technology providers - printheads, inks, curing systems, materials, instrumentation, etc.

In addition to suppliers of components and consumables, equipment suppliers will also be participating to provide a further depth to the concept in the Indian context.

IMI

IMI runs the largest and most comprehensive conference and seminar programme in the digital printing industry. Each year over 2,000 industry technical and management personnel from over 600 companies attend more than 20 programmes covering ink jet, thermal, laser, industrial and other forms of digital printing.

Xyanni

Xyanni, the India Partnership for Emerging Enterprise, creates and delivers market strategy and business development services, as a key partner, to those small and medium sized clients in Europe/ West, that are planning to expand their activities, relating to emerging sectors, to India.

Theory of Ink Jet Technology

■ Ink Jet Components, Consumables, Equipments India 2008

Suppliers:

We are now inviting suppliers of ink jet components, consumables, and equipments to sign up for the sponsorships and participating in shaping Ink Jet India 2008 and the Indian ink jet industry. Some examples of the kinds of relevant suppliers are given below. As the industry is growing, there are opportunities for other kinds of suppliers too.

Components

- Printheads
- Instrumentation
- RIP software
- Integration services

Consumables

- Inks
- Media
- Printheads
- Dispersions

Equipments

- Wide format
- Coding & marking
- Textiles
- Flat bed UV

Propositions:

This event enables technology suppliers (printheads, inks, media, instrumentation etc.) to showcase and present their technologies, expertise and capabilities to ink jet system developers, integrators, distributors and users. This event's focus is to inform, develop relationships and sell, through a combination of company presentations, display booth and private meetings in a unique and cost-effective format. And here's how you will benefit:

- **Pre & post-conference publicity** via named (full contact information) inclusion in Ink Jet India 2008 brochure (1,000+ distribution within India plus press releases & web site posting & e-mail distribution to 60,000+ Indian e-mail addresses) if registration confirmed well in advance.
- **Web site link** from Xyanni, IMI & IMI Europe web sites
- **Uploading** of your brochures on Xyanni web site, for a limited duration.
- **Display space** with power, draped table & 2 chairs (if desired)
- 20 minute presentation time to present your company's technology, products, services & capabilities. Presentations are in sign-up order, so register soon for an early slot!
- **Your presentation notes** distributed to all attendees.
- Your **presentation notes** uploaded on Xyanni web site for a limited duration.
- **Complete name & address list** of all attendees.
- Opportunities for privately scheduled **meetings**.
- **Networking** opportunities with all categories of ink jet printing professionals
- **Keynote** presentations from industry experts and major end users
